

# Safe Driving with Semi-Autonomous Vehicles

This course coaches the safe operation of, and appropriate driver behaviour for, vehicles with advanced safety systems.

Semi-Autonomous vehicles with advanced safety systems are developing at a rapid pace, offering drivers a multitude of active and passive safety features. This course ensures that your drivers fully understand these enhanced safety capabilities and how to maximise their benefits. Driver distraction and overreliance on such systems is also addressed, with the aim of ensuring that the driver is safely in command of his or her vehicle at all times.

This course focuses on the safe operation, features and benefits of advanced safety systems, whilst retaining a key focus on the individual driver's:

- Behaviour
- Confidence
- Attitude

Following standard pre-training, eyesight and vehicle checks, the safety and driver support specification of the delegate's vehicle will be reviewed and explained in detail.
