

Snow Plough (4WD)

This session is designed for drivers of 4WD vehicles with snow plough accessories fitted for snow and ice clearance.

The course assesses and then provides for the risk level and development needs of each driver.

Safe operation of snow plough equipped vehicles is the key focus of this session, as ploughs are amongst the largest and most dangerous accessories that can be fitted to vehicles.

This course ensures that drivers are fully aware of their vehicle's capabilities and differences to standard cars/vans, and how to safely operate them both on the public highway and in off-road environments.

The course includes:

- ⚙ HSE at Work PPE requirements
- ⚙ Snow plough safer operation and 4WD systems – applications and controls, transfer and automatic gearbox
- ⚙ When to plough – as soon as possible
- ⚙ Driving techniques – ploughing around obstacles, kerbs etc.
- ⚙ Preparation: pre-mark dangers and edges when snow is expected
- ⚙ Winter tyres and grip
- ⚙ Maintenance: before and after use

- ✓ The course can either be delivered at client site, in client vehicles (if available), or using Business Driver's site and vehicles (additional costs).
- ✓ Full Post Training Reports will be submitted with 48 hours of completion.
